SUMMARY

Dynamic AI, Cloud, and Data Engineer with 1+ years of experience at Johnson & Johnson and Comcast, skilled in AWS Cloud, Python, AI Agents, and full-stack software development. Recognized as a quick learner, problem solver, and team player.

EXPERIENCE

Johnson & Johnson | Spring House, PA

June – Present

AI & Cloud Technical Lead (Business Technology Co-Op)

- Leveraged **AI agents, NLP, and RAG architecture** to summarize, query, and analyze biomarker research PDFs and presentations for the oncology division, automating manual workflows and accelerating data-driven decisions.
- Architected, deployed, and maintained **AWS cloud** environments. Provisioned **EC2 instances** and **RDS MSSQL servers** to replicate external acquisition environments supporting **end-of-year corporate tax data**.
- Improved R&D data onboarding efficiency by **99+%** and reduced labor-intensive data organization by developing **Python data flattening** script, parsing **thousands** of lab notebooks and organizing external research for in-house scientists.

Comcast NBCUniversal | Philadelphia, PA

May – Aug 2024

Software Engineer (Enterprise Applications SWE Intern)

- Reduced manual response overhead by **20%** by developing a chatbot using Microsoft Azure's **LUIS and CLU (Generative AI)**, achieving **96%** response accuracy through daily training via **Microsoft Graph API** data extraction.
- Resolved **multi-threading** bugs to avoid **race conditions** in a **Scala**-based ticketing system, ensuring proper time-out handling and ticket integrity. Managed code deployments via **Terminus** and **Hadoop** for monitoring, using **Git** daily.
- Improved my team's anomaly detection accuracy by **75%** compared to the existing Facebook Prophet model through **ML-based univariate and multivariate** scripts, applying models like **One-Class SVM and Neural Networks**.
- Designed a streaming app feature, still under review, projected to generate **\$13.2 million** annual revenue for Comcast.

Comcast NBCUniversal | Philadelphia, PA

May – Aug 2023

Site Reliability Engineer (SRE Intern)

- Saved Comcast **\$1.25 million, 83.3%** of chatbot budget by leading development of a dynamic ChatGPT-powered in-house chatbot, replacing a waterfall-based service (Zendesk) as part of a cutting-edge capstone project.
- Developed a **Python** script that extracted diagnostic **JSON** data from multiple **Comcast REST API endpoints**, exported it to a .csv file, then uploaded it to the team's **Cloud Foundry database**, improving efficiency by **99+%**.
- Collaborated in an **Agile** team with daily stand-up calls to ensure efficient project progress and alignment.

EDUCATION

Stevens Institute of Technology

Hoboken, NJ

Bachelor of Science in Computer Science

May 2026

Awards: All-Academic Team, Scholar of Distinction, Dean's List: 2022, 2023, 2024, 2025

GPA: 3.77

Relevant Coursework: Cloud Computing, Machine Learning: Fund & Apps, Web Development, Database Management, Operating Systems, Concurrent Programming, Cybersecurity, Data Structures, Algorithms, Computer Architecture and Org.

Certifications: Career Essentials in Cybersecurity by  **Microsoft** and  **LinkedIn** – [Certificate](#)

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript, SQL, HTML/CSS, Kotlin, Scheme, Ocaml, R, Bash, Groovy, TypeScript

Frameworks: TensorFlow, MySQL, Docker, Kubernetes, Angular, Spring Boot, Apache Spark, Kafka, Grafana, AppDynamics

Tools: Git, AWS, MongoDB, Linux, Unix, Node.js, Express, Android Studio, Jupyter Notebooks, Anaconda, Powershell, Jira, Confluence, VS Code, Visual Studio, IntelliJ, Eclipse, Figma, OpenBSD, PostgreSQL, Excel

PROJECTS

BokenBoards | *JavaScript, HTML, CSS, Node.js, Express, MongoDB, GeoJSON, Web Development*

- Built a **full-stack** board game sharing web application, with robust features like user profiles, game reviews, event RSVPs, and an interactive blog. Increasing community participation by **over 60%**, leveraging **geospatial querying**.

Senior Citizen Covid-19 Vaccine Registration | *Python, Google Forms API, Compliance*

- Automated **COVID-19** vaccine registration for senior citizens by programming a **Python** script.
- Secured appointments for **30+** individuals by leveraging Google Forms API to extract and process user input.

Concussion Detection Gadget | *Java, C, Kotlin, Hardware, Android Studio, App Development*

- Built a device with embedded code that can diagnose the **severity** of head collision by **calculating g-force** of hit
- Accelerated concussion diagnosis by over **74%** by developing an **Android app**, displaying the player's type of concussion

EXTRACURRICULARS

- Stevens Men's Fencing Team: Achieved **83.3% win rate** career win rate. | Men's Intramural Basketball & Flag Football
- Cadet Captain JROTC: Led a 40-person platoon | Lenape High School Men's Soccer Team
